

Creator DLX MKIII

Specification sheet

Creator DLX MKII novel type of mixing optic for powerful and even colour mixing. Colours are mixed within the luminaire itself, thereby eliminating undesirable colour shadows.

Thanks to the innovative 14 bit dimming technology, the Creator DLX can be dimmed in much the same way as a luminaire with a halogen light source and therefore mixes easily with luminaires in existing set-ups

Technical Specifications

- 14 bit "smooth" dimming Flicker free
- Very Silent thru variable Fanspeed
- 18x12 watt 6 in one led's 216 Watt total
- 30 degrees lenses, outstanding colormixing and very high Lightoutput
- Compact black aluminium Housing with double Brackets
- Provided with filterclips
- Digital display
- Electronic powersupply with PFC correction
- 12 DMX channels maximum
- 3 pole DMX in and out (5 pole on request)
- Powercon in and out incl. powercon cable
- Max Power: 230 watt
- Dimensions: 230x230x330mm
- Weight: 4,0 kgs
