

Whitey Moving Fingers MKII Specification sheet

The GLG Whitey Moving Fingers MKII is designed with 8PCS 15W white LEDs. It's a fixture producing outstanding white BEAM effect and high light output, Each LED is a pixel that could be controllable individually, not only speed but also saturated linear dimmer. It offers 12 default pixel macro functions. This feature could create an amazing streaming effect, slow to fast. The fixture comes with 8 internal working programs for easy perfor-

mance in a rather simple way. It also features ultra fast 230° and smooth TILT movement which brings wider range operation for users. It's a simple pack-and-go system, easy for installation with two 1/4 turn fastening Omega Clamps.

The Whitey moving fingers is available for small to medium live concerts, TV studios, road shows, mobile DJ, clubs.
